Call Waiting Call Forwarding 1. Immediate Call Forwarding It allows you to listen to another incoming call while putting first caller on hold. During the conversation, if the second call is received on your number, you will hear a beep during the conversation. This facility redirects incoming calls on your phone to your desired number (All forwarded calls will be charged as per tariff). You can do following call forwarding in three manners. Incoming calls to your Nayatel telephone will be directly forwarded to your desired number. You can enable it by following method. If you want to listen second call, do the following procedure: Press Flash/Cradle Key to start conversation with the second caller. This will put the first caller on hold After finishing with the second caller, do the following procedure: press the Flash/Cradle Key to resume conversation with the first caller. To enable immediate call forwarding on your telephone line, proceed as follows: *57 * (NUM) # (NUM) is the number, to which you want to forward your calls from your Nayatel Telephone. To disable immediate call forwarding on your telephone line, proceed as follows: # 57 #

2. Call Forwarding If No Reply If your phone line is unanswered for 8 rings or 30 seconds, the call will be forwarded to your desired number. To enable it, proceed as follows: *41*(NUM) #

(NUM) is the number, to which you want to forward your calls from your phone To disable it on your phone line, proceed as follows: #41# 3. Call Forwarding If Line Is Busy Incoming calls can also be forwarded to your desired number, if your phone line is busy. To enable it on your Nayatel telephone, proceed as follows: *40*(NUM) # (NUM) is the number, to which you want to forward your calls from your Nayatel Telephone To disable it on your Nayatel telephone, proceed as follows: #40#

Value Added Service	Activation PIN	Deactivation PIN
Immediate call forwarding	*57*NUM#	#57#
Call Forwarding IF no Reply	*41*NUM#	#41#
Call Forwarding If line is busy	*40*NUM#	#40#

Call Transfer Call Transfer enables you to transfer any incoming or outgoing call to any phone number

1. **Incoming Call Transfer** By using this service, you will be able to transfer an incoming call to another number by using following procedure You receive a call from a number. Put the first caller on hold by pressing the FLASH/Cradle Key You will now hear the normal dial tone. Dial the number of the second person. When the call is answered press FLASH/Cradle key and digit “4” After disconnecting the call, both the other callers will be connected to each other. 2. **Out Going Call Transfer** By using this service, you can dial two numbers and connect them with each other by using following procedure Call the first number on your phone Put this first call on hold by pressing the FLASH/Cradle Key. You will hear the normal dial tone. Dial the second number When the call is answered, press FLASH/Cradle key and digit “4”. Both the other callers will be connected to each other. 3. **Three Way Conference Call** Conference call enables you to speak to two different phone numbers at a time. Following is the procedure to make a three way conference call. 1. 2. Call the first caller. When the call is answered, put the first caller on Hold by pressing the Flash/Cradle key. Dial the second number. 3. When the call is answered, press the Flash/Cradle Key and Digit “3”. You are in conference with the other two callers.
