Why Nwatch is your smart security partner

Smart White Light

White light activates on motion to enhance visibility and deter unwanted activity.

Colored Night vision

Enables colorful and detailed night footage to enhance visibility and overall security.

Cloud-based storage

Secure your recordings with Nayatel-hosted Storage Cloud for up to 6, 12, or 18 days.

HD view

Experience ultra-high-definition footage with 1080p resolution for precise monitoring.

Night vision

Ensure clear and detailed surveillance with advanced night vision technology.

Multi-view

Monitor different areas of your home simultaneously via multiple camera views.

Motion detection

Receive instant alerts as your camera detects the cause of unusual movement.

Live surveillance

Access 24/7 live viewing of your home through the Nwatch app anytime.

Let's get in touch!

We're here to help you with any questions, feedback, or support you may need. Fill out the form, and our team will get back to you shortly.

What is Nwatch?

Nwatch is an advanced security service that offers HD cameras with cloud storage. It ensures 24/7 monitoring, motion detection alerts, and secure cloud recording, accessible from anywhere via the Nwatch app.

Can I specify areas for motion detection?

Yes, Nwatch allows you to define specific zones within the cameras view for motion detection, helping you focus on critical areas and reduce false alarms.

How long can I store my recordings on the cloud?

Nwatch offers flexible cloud storage options, allowing you to keep your CCTV recordings for 6, 12, or 18 days, depending on your chosen plan.

What features does Nwatch offer for home and business security?

Nwatch includes features like live view, motion detection alerts, multi-view for monitoring different areas, fast-forwarding through recordings, and secure cloud storage. It also supports night vision for round-the-clock surveillance.

How does cloud storage work with Nwatch?

Nwatch securely backs up all your camera recordings on Nayatel's locally-hosted cloud servers. This ensures your footage is safe from theft or damage and can be accessed anytime via the app.

Can I use my own cameras with Nwatch?

Nwatch supports ONVIF-compliant IP cameras, so you can bring your own compatible cameras and integrate them with the Nwatch system.

What are the hardware specifications for Nwatch cameras?

Nwatch offers 2MP and 4MP HD IP cameras with features like audio support and power over Ethernet (PoE). These night vision CCTV cameras provide high-definition video and face recognition within a 15-20 feet range.

How do I install Nwatch cameras?

Nayatel's professional team handles the Nwatch CCTV camera installation. The installation service includes cabling and setting up the cameras to ensure optimal performance.
